MONETARY REFORM

A meeting was held on Friday last by members of the Calgary New Age Club, representing the Social Credit League of Alberta, for the purpose of explaining the system as propounded by Major Douglas, the chief spokesman, Mr. C. G. Palmer, said: "Let there be no misunderstanding; we are not supporting any party that is in sympathy with monetary reform."

There is one party more than that, another who is sincere and honest in its advocacy of monetary reform; that party is the U. F. A. For the past 12 years it has fought hard, consistently and courageously for a change in the present monetary system.

By the statement made by C. G. Palmer on behalf of the Social Credit League of Alberta, it is clear that full support will be given to the U. F. A. by the Calgary branch of the Social Credit League.

Trend Toward Peace Found in Canadian War Questionnaire

A Social Credit meeting was held in the Ontario Hotel, Calgary, Friday evening. There was a fairly good attendance. Messrs Palmer and Kennedy, of Calgary, were the principal speakers. A short musical program also was put on. Mr. Douglas gave a violin solo, and Miss Thomas sang a solo. The pianist, "Shanty" Swallow, who was in company with the violinist, gave an exhibition of his talent.

HEALTH

A HEALTHY SERVICE OF THE PUBLIC HEALTH DEPARTMENT, CALGARY, ALBERTA.

APPENDICITIS In the year which has passed, appendicitis was responsible for over fourteen hundred deaths in Canada.

There is much to be accomplished in the fight against this disease, and the public health department is now working to bring about a more frequent occurrence, but the fatalities arising out of such accidents have been more than those due to appendicitis.

The city of Philadelphia has given particular attention to this disease. For five consecutive years, a study has been made of all appendicitis deaths occurring in that city in order to determine the factors which contributed to the fatal outcome. At the same time, the Department of Public Health has carried on an educational campaign in the hope of improving conditions. We should learn from the experience of Philadelphia in order that we may profit by it, and the findings of the Philadelphia study are presented to our readers.

Patients admitted to hospital within twenty-four hours of the onset of disease, suffered a mortality of less than 2 per cent; between twenty-four and forty-eight hours, the mortality rose to over 4 per cent; when the patient was admitted to hospital more than 48 hours after the onset of disease, the mortality was over 10 per cent.

From these figures summarizing the experience of a large city for five years, it is clear that the factors which everyone may understand the percentage of deaths rise in ratio to the delay in seeking proper treatment.

Of the total, approximately 3,000 died who have a history of less than 24 hours; 2,229 had a history of 24 to 48 hours; 1,181 had a history of 48 to 72 hours; 729 had a history of 72 to 96 hours; 400 had a history of 96 to 120 hours; 229 had a history of 120 to 144 hours; 143 had a history of 144 to 168 hours; 100 had a history of 168 to 192 hours; 67 had a history of 192 to 216 hours; 34 had a history of 216 to 240 hours; 17 had a history of 240 to 264 hours; 10 had a history of 264 to 288 hours; 5 had a history of 288 to 312 hours; 3 had a history of 312 to 336 hours; 2 had a history of 336 to 360 hours; 1 had a history of 360 to 384 hours; 1 had a history of 384 to 408 hours;
